+62895389310672 | edwardpaundraaa@gmail.com | https://www.linkedin.com/in/edward-paundra
Sunter Jaya, Jakarta Utara, Indonesia.

I am a Web Developer with over 1 year of experience in designing, developing, and maintaining applications based on .NET Framework and .NET Core. Skilled in object-oriented programming (OOP), API integration, SQL Server database management, and implementing software architectures such as MVC, Web API, and Microservices.

Accustomed to working both independently and collaboratively in a team, with a strong focus on clean code, performance, and application security. Experienced in SQL query optimization, debugging, and application deployment, with the ability to work effectively under pressure and tight deadlines.

Work Experiences

Radsoft System - **Jakarta, Indonesia** May 2024 - Present

Developer

PT Prima Solusi Computindo, known as RADSoft, is a software development company specializing in financial and portfolio management, established in 2013 and based in Indonesia.

- Developed and maintained applications based on .NET Framework and .NET Core according to business needs.
- Designed and implemented REST APIs for integration between internal and external systems.
- Optimized application performance and SQL queries to support large-scale business data processes.
- Collaborated with the team in sprint planning and code reviews.
- Performed debugging, unit testing, and deployment of applications across multiple environments (development, staging, production).
- Implemented clean code principles and application security standards.
- Assisted in user requirements analysis and provided efficient, scalable technical solutions.

PT Sinar Palasari Indonesia - **Surabaya, Indonesia** Sep 2022 - Jun 2023

Intern Programmer

PT Sinar Palasari Indonesia operates in the telecommunications sector, focusing on tower maintenance CME, collocated CME projects, tower reinforcement, safety wire installation, ladder installation, ladder cover installation, as well as tower audits and measurements.

- Developed an Android-based employee task management system with a focus on efficiency and usability to improve company performance and productivity.
- Designed a user-friendly UI/UX by prioritizing simple navigation, clean design, and relevant information.
- Utilized Kotlin, jQuery, PHP, Java, HTML, and CSS to implement a functional and advanced application.
- Application testing results demonstrated a significant success rate, achieving up to 90%.
